

King County Department of Assessments

Executive Summary Report

Appraisal Date 1/1/99 - 1999 Assessment Roll

Area Name: 20 – North Beacon Hill

Previous Physical Inspection: 1993

Sales - Improved Summary:

Number of Sales: 256

Range of Sale Dates: 1/97 – 12/98

Sales - Improved Valuation Change Summary:

	Land	Imps	Total	Sale Price	Ratio	COV
1998 Value	\$45,600	\$94,000	\$139,600	\$156,800	89.0%	15.6%
1999 Value	\$49,200	\$107,200	\$156,400	\$156,800	99.7%	9.3%
Change	+\$3,600	+\$13,200	+\$16,800		+10.7%	-6.2%*
%Change	+7.9%	+14.0%	+12.0%		+12.0%	-40.1%*

*COV is a measure of uniformity, the lower the number the better the uniformity. The negative figures of -6.2% and -40.1% actually represent an improvement.

Sales used in Analysis: All improved sales, which were verified as good, were included in the analysis. Multi-parcel, multi-building, and mobile home sales were excluded. In addition the summary above excludes sales of parcels that had major changes (e.g., remodeled) after the sale and those with improvement value of \$10,000 or less posted for the 1998 Assessment Roll. These parcels do not accurately represent percent change results for the overall sales sample.

Population - Improved Parcel Summary Data:

	Land	Imps	Total
1998 Value	\$47,100	\$95,100	\$142,200
1999 Value	\$50,800	\$106,800	\$157,600
Percent Change	+7.9%	+12.3%	+10.8%

Number of improved Parcels in the Population: 2920

The population summary above excludes multi-building, and mobile home parcels. In addition parcels with 1998 or 1999 Assessment Roll improvement values of \$10,000 or less were excluded to eliminate previously vacant or destroyed property value accounts. These parcels do not reflect accurate percent change results for the overall population.

Conclusion and Recommendation:

Since the values recommended in this report improve uniformity, assessment level and equity, we recommend posting them for the 1999 Assessment Roll.

Sales Sample Representation of Population - Year Built

The sales sample adequately represents the population with regard to Building Grade.

Comparison of 1998 and 1999 Per Square Foot Values by Year Built

These charts clearly show a significant improvement in assessment level by year built as a result of applying the 1999 recommended values. The values shown in the improvement portion of the chart represent the total combined value for land and improvements.

Comparison of 1998 and 1999 Per Square Foot Values by Above Grade Living Area

These charts clearly show a significant improvement in assessment level by Above Grade Living Area as a result of applying the 1999 recommended values. The values shown in the improvement portion of the chart represent the total combined value for land and improvements.

Comparison of 1998 and 1999 Per Square Foot Values by Grade

These charts clearly show a significant improvement in assessment level by Building Grade as a result of applying the 1999 recommended values. The slight gap between SP/SQFT and the total for the Grade 9 strata is due to the limited number of Grade 9 sales (only one in the sample). The values shown in the improvement portion of the chart represent the total combined value for land and improvements.
